

TUALATIN HIGH SCHOOL

- Expand School to accommodate existing and projected enrollments including:
- Build a 6-room classroom wing and expand TECH wing;
 - Enlarge “Commons”/lunchroom to provide space to serve 900 students each lunch; add restrooms;
 - Move main office to center of school and convert existing office area into classrooms;
 - Enlarge girls and boys locker rooms and build multi-purpose P.E. space; install multi-purpose turf field.

Tualatin High's main building was built for 1,700 students. Nearly 2,000 students are currently enrolled. It is undersized both for the number of students it serves now and in comparison to 2,000-student high schools being built today. More classrooms, restrooms, an expanded Commons (lunchroom), locker rooms and P.E. spaces are needed for existing and projected enrollments.
